

Why are US cemeteries filling with veterans dying by suicide? Protesting lack of care that they are not getting from VA or USA! How simple can that be to figure out? Even an uneducated village idiot knows that!!

Every vet suicide on VA property tells the same story: VA staff mistreatment is root cause of every veteran death by suicide. While VA may not be responsible for every death, it owns every one of them on its premises and for lack of veteran care in all the others.

The whole shame is that if VA would have from the beginning, done what it claims to do for Veterans instead of denial, betrayal, and lying inanities - the reader would never have heard a peep out of me. I wanted to believe VA helped veterans but now know it only helps self, profiteering at taxpayer and veteran expense.

I saw a VA psychologist for over a year that offered exposure therapy to ease my symptoms, but ultimately made them far worse, to the point I became suicidal. I felt confident enough to tell him that it wasn't working and he responded with, "You know I am doing you a favor by seeing you." ...getting in touch with your doctor through the VA is like killing yourself—so it's a lose-lose situation. Kat Kaelin, The Havok Journal February 28, 2019.

"VA sucks a bag of sweaty camel dicks." Sophia-Helene Mees de Tricht, US Veteran, Afghanistan – 'Women's VA.'

Famous last words that it could never happen here; history repeats never in the same way but nonetheless repeats...the same. The useful idiots are always disposed of last. Yuri Bezmenov, KGB message to USA detailing Communist overthrow from within the country.

While waiting in VA Dallas regional, I overheard two frustrated VA medical employees in discussion. One said to the other, "VA is another chance for Veterans to suffer and die for their country..." The other employee snorted agreement.

Everyone knows that a plane crash cannot be fixed; it is cleaned up, sent to salvage and replaced with a new plane. VA is a plane crash in toto. Any questions? RA – USAF, Vietnam and Cold Wars – SAC Mobile Alert, Nuclear First Strike Forces.

VA is a taxpayer funded, white elephant, dark horse corporate culture driven by greed and mammon not US veteran welfare. RA – USAF, Vietnam and Cold Wars – SAC Mobile, Nuclear - First Strike Forces.

First They Came

First they came for the ~~Native Americans~~

Then they came for the ~~Jews~~

Next they came for the ~~soldiers and veterans~~

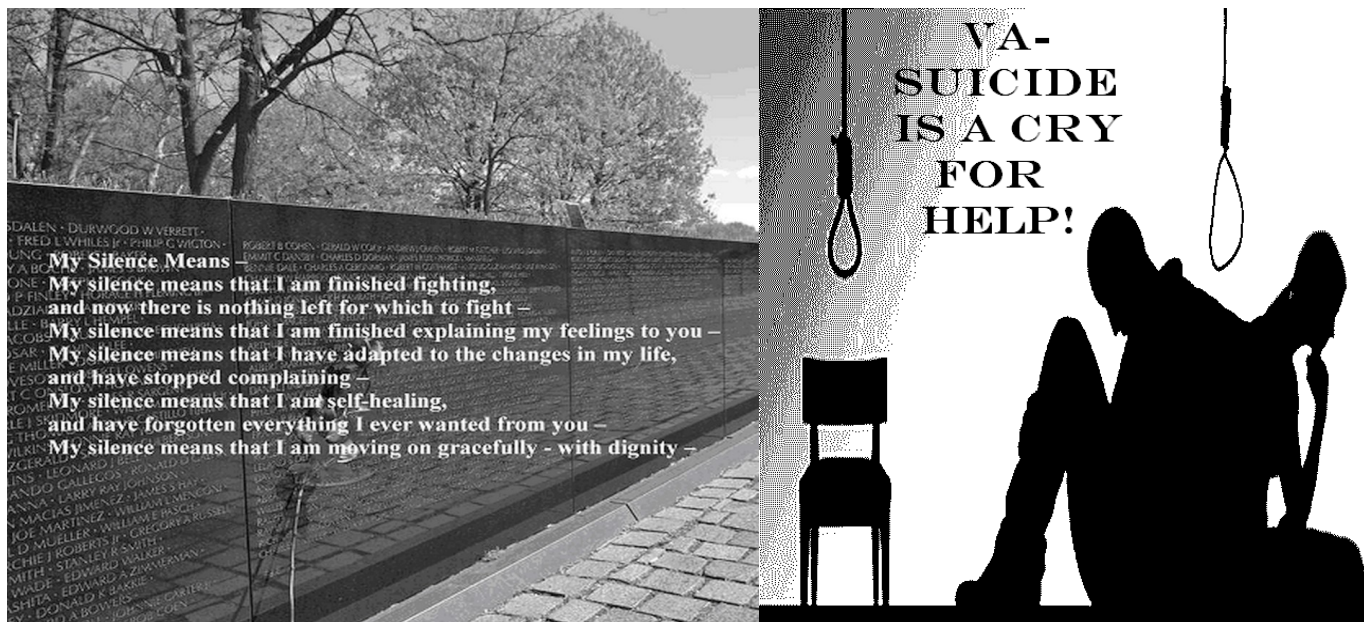

When they came for you and me

None were left to fight for you....or me.

If you will not stand with us

When it is your turn, who will stand and fight with you?

Just remember they always dispose of useful idiots last.

*No greater national disgrace exists than when a man or woman is so distraught that s/he dies by suicide as protest, sending **THE** message that screams “FAILURE” to his or her country written in veteran blood. Over seven times the 69,000 US troops that were killed in Vietnam War have since died by suicide from not getting needed care from America. Currently, more Veterans die by suicide every year than the total number of combat deaths in Iraq and Afghanistan combined. Where is their remembrance? We do not need more token emotional moments or memorials; US Veterans and active Military people, we walk among the living you know – and need true HELP! America, land of hypocritical broken promises and phony heroes, reserve, your cold, non–living headstones for the Dead.*

After discharge, VA and transition benefits were a complete fraud. I was salvageable then. When applying for C&P and service related help, VA betrayed me, lied and denied them in toto, and then sinking to a new low even for VA blamed my mother for service related problems! Moreover, the misogynist adjudication officer was arrogant enough to put that in writing, and I still have the rejection letter proving it. I never forgave the company for either sin especially about blaming my mother and now for murdering my dad in 2008 in one of its filthy hospitals. Can you say Clarksburg West Virginia home of recent mass murder scandal and cover-up.

*VA payments in **FREE** party slogans such as ‘thanks for your service’ discounts that we served with a gun barrel in our backs held by violence of US conscription law. Our choices of serve, exile, or imprisonment were the evils presented from ‘we the American people and its government’ when drafting us into the Vietnam conflict and war. Then they officially betrayed all of us – in toto – January 21, 1977. Socialists call that freedom.*

Stigma of the Vietnam War still curses Veterans of that era, and will do so until we all die. Then it befalls to the rightful owners – The American nation and its government that waged it.

As an aside, I have had 3 VA C&P interviews, all from North Texas VA Healthcare system, with as much chance at parity before bigoted black women as my Jewish ancestors did during WW2 begging for mercy from Nazi’s closing the gas chamber doors at Treblinka. Some would say, ‘I am receiving the injustices met out to black folk.’ Oddly, Nazis claimed the same reasons when persecuting Jewish scapegoats. Bigotry blinds people horribly to many things; for, my skin may appear white especially when that sickly pale; however, a mixture of Afro–Black Seminole, Brown Seminole, Cherokee, Russian, Jewish, and ironically German ancestral bloodlines comprise the skin that covers my body and blood that bleeds from it. My blood and skin are just as black as her’s but in smaller quantities. This human form is gendered male and female, but nature constructed it dominant to the male polarity and her’s to the opposite. Our flesh is the same: fragile, corporal, and dying. My Jewish ancestors, after German occupation of Poland in WW2, died in the Warsaw Ghetto and most of the survivors were butchered in the Nazi-Treblinka human slaughterhouse. My Russian ancestry underwent far, far

worse under Joseph Stalin's purges. He made Hitler look like a piker. My Native American ancestors along with the Buffalo were genocidally hunted to the brink of extinction by the US government patriots, its Military and bounty-scalp hunters. And survivors remain confined on Native American Reservations aka US Concentration Camps. Government bureaucrats just like that woman confine them there. Moreover, my bloodlines faced judgment from public servants just as she during summary executions at the end of a gun, rope, club, and saber, rotting in a gulag or concentration camp cell, and worse. I sympathize with her Black Nation's suffering; however, they are not the only human communities that have faced persecution in USA and elsewhere. The only apology I am permitted to make to her people is this, if my 'heathen' ancestors would have allowed those fine 'Christian Pilgrims' to die starving in our maize fields those first winters, instead of helping them survive, black slaves would never have set foot on North American soil. For that only, I extend my condolences. Moreover, the only difference between she and I is that I do not wear ancestral intolerance as a chip on the shoulder or as a shirt sleeve of vicious self-pity to use as an excuse to hurt people out of self-hatred. Her bigotry did not go unnoticed during the interviews. I have encountered far too much of that in the VA system in toto. While 78% of VA employees hypocritically claim racial bias within the system against them, why is their bigotry and ethnic bias against veterans never mentioned at all? Nevertheless, I served this country defending every American's right to be a bigot same as those woman's. What surprises me is in finding so much of it at a US government agency that claims to enforce US laws against practicing bias. Ignorance is what ignorance does. Every VA C&P review but for one was like that conference: dehumanizing, degrading, intolerant, humiliating, and a squander of time except for securing a soulless bureaucrat's job, which epitomizes the jackboot of parasitic, US, National Socialism – aka Nazi. I am a US Veteran not a Comprachicos freak. Out of self-respect and tribute to the uniform once honorably worn in service to the US, I shall never again expose my soul to contemptuous VA kangaroo adjudication or its bigotry. WW2 did not defeat Hitler's Nazis; they relocated to USA and set up shop in corporations like Veterans Affairs Dept persecuting, torturing and killing veterans instead of Jews. Anonymous.

Veterans Affairs Department, aka VA is a FAILED dark horse, white elephant benefits and healthcare organization well past overdue for sunset and retirement from Federal system. That special interest budget is sorely needed elsewhere in this very sick Nation. Over 90 percent of US Veterans do not use the institution. If veteran health care and benefits were really the issue, Veterans Affairs Dept. would not exist. VA's skewed data is that almost 87 percent of US vets do not use VA at all. Instead, Veterans receive it outside from private healthcare funded by state Medicaid, Federal Medicare, Obamacare, state county and locally taxpayer funded healthcare systems, and private health insurance, ad infinitum. Many awarded Social Security and other Disability claims to veterans are those previously denied by VA. The agency is now well known among critics and most veterans who have used it as the worst healthcare system in America; a reputation that the scandal-plagued institution warrants very much, notwithstanding innumerable fancy mass media productions and web pages stating otherwise. Few veterans fall for those lies and the willfully stupid, deaf, dumb and blind agency cannot fathom why. From Phoenix outrage during Obama's era, to Clarksburg West Va. Hospital veteran mass murders by VA hospital staff, to the continuing national veteran suicide epidemic by those trapped in it protesting with their lives - a criminally, negligent, Socialist failure; Socialism always, without exception, disastrously fails everywhere it is attempted. VA is responsible for veteran suicides occurring either in VA clinics, hospitals or on campus parking lots or elsewhere while undergoing treatment shortly after release from VA-MHC facilities, in which medical staff drugged and psychologically terrorized them into suicidal psychosis just before death. Dead veterans cannot speak...or can they, but only to those who listen. We veterans know why they died yet no one outside of our circles wants to know the truth; *least of all VA.* The big propagandized lie is that VA provides healthcare on par or better than private HCS. Really, if so then why are over 90 percent of we vets using private HCS? Why are those still using VA, when possible, getting their actual care from outside HCS visiting a VA clinic or hospital only once a year to keep disability benefit payments current? *Why in nationwide polls, not skewed by VA, VSO and similar special interest, dishonesty, do over 88 percent of vets who answered them want true, free choice of where to go entirely outside of government VA administration?* True choice - not sabotaged pseudo-voucher VetChoice and Mission Act programs set up to fail that burden vets into paying out of pocket all expenses to outside doctors and medical facilities for their 'outside' care when *deadbeat VA does not pay its bills.* Typical bureaucratic protocol: offload work and onus elsewhere while keeping billions in budget for not doing the task. VA is a plane crash in toto; everyone knows plane crashes cannot be fixed; they are cleaned up, sent to salvage and replaced with a new plane.

‘A lie is a lie even when everyone believes it; truth remains truth even when nobody believes it. Adolf Hitler.

The Big Lie. Adolf Hitler once quipped, “ [*When telling a lie, tell the biggest lie possible, mixed with a grain of truth so that masses will believe it...*]” Ol’ Adolf should know for all the ‘porkys’ he and his Nazi’s got away with telling during WW2. Those folks wrote the book “*Effective Mass Lying 101.*” VA PR refined that to a fault. A pervasive part truth that veterans get ‘free’ healthcare and benefits on par or better than private sector is now a commonly believed, persistent, propagandized, *whole lie*. Here are the historical facts – you figure out the rest. During the Clinton Administration, first lady, Hillary Clinton’s plan was to sell America on Socialized Healthcare. She needed a sterling Socialized example so chose the VA as her model. Armed with a presidential decree she gave VA an ultimatum: reform into that sterling model or else. *Hillary Clinton needs no introduction: she has sharp teeth and a very nasty bite. However, one has to give that woman credit! She got things done in Washington DC! One woman accomplished what all our representatives in ‘The Ship of Fools’ US Congress could and still cannot: meaningful VA reforms.* In 1994, Clinton put Kenneth Kizer in charge of the VA health system, as Undersecretary of Veterans Affairs. The new sheriff over that agency had large teeth and a nasty bite, too. Kizer among his many accomplishments, reformed VA; he modernized the VA’s computer systems, fired poor-performing doctors, support staff, and established private-sector-style metrics to measure the VA’s performance on things like patient wait times, care quality, service, etc. In other words, during his five-year tenure, armed with Oval Office authority, not more and more budget money, Hillary and Kizer reformed VA into a top-performing healthcare and benefits institution, which became a jealously envied crown jewel by the US private sector medical industry. Wrested from entrenched, status quo ‘good old boy and girl’ interests, dead set against them derailing their gravy trains, *Hillary and Kizer created a long overdue mammoth train wreck from them to provide quality Veteran healthcare and the benefits they deserved for the very first time in VA history.* However, all good things must end; after Clinton left office and Kizer resigned from VA so did their success story. Recidivism quickly reclaimed the institution to its former free lunch and ride on VA gravy trains for status quo ‘good old boy and girl’ special interests: VSO’s, political pork, crony’s, internal corruption, etc. All the while, stealing credit for Clinton and Kizer created successes during the 1994-1999 ‘VA golden age.’ In other words, VA propagandized Clinton’s and Kizer’s accomplishments from over 22 years ago plagiarizing credit for what it did not do. VA now is considered the worst healthcare system in America; while perpetuating commonly believed, lies to the contrary that even ol’ Adolf Hitler and his Nazis would envy. Ref in part to Avik Roy, Forbes Staff writer. BTW, WW2 did not defeat the Nazis; they relocated to USA and set up shop in places like the VA. *Plane crashes are not fixed. They are cleaned up, sent to salvage and replaced with new plane. VA is a plane crash in toto. To defend that agency at all takes a special kind of dishonesty and denial. Any questions?.*

In other words, Veterans Affairs Department gives US healthcare benefits systems, socialized or other, a VERY BAD NAME!

I now understand first hand and up close why US Veterans undergoing VA MHC treatments are killing selves on and off VA campuses. VA ‘therapists’ drug and terrorize disturbed vets into suicidal psychosis! Here is my recent experience in a VA North Texas Healthcare clinic that I can only sum up as a first degree ‘Mind-Fuck.’ Yes, ‘Mind-Fuck’ is a vulgar term that eloquently describes my personal experience in toto! However, if offended, substitute PC ‘Mind Rape’ softer language in its place.

My recent visit to a local North Texas Healthcare VA clinic in Ft. Worth, TX taught me why the Vet in 2019 walked out of a VA MHC ward and immediately suicided on the campus parking lot! Then another parking lot suicide that shut down VA Dallas Regional MHC ward followed days later, by another Vet that did so in a central Texas VA clinic waiting room, then another in Amarillo, TX after VA appointments, about which, in all three instances, VA refuses to publicly release details. **Why did 24 veterans die by suicide on VA campuses in the 18 months between 2017-2019?** Here is why. VA ‘therapists’ are purposely drugging and provoking vets into killing selves. Moreover, VA employees consider any vet that threatens suicide or comes in for suicidal ideation treatment as harassing them! Yes, that is right, harassing VA employees, so they intimidate, minimize, and worry a vet out the door instead of helping s/he. Evidence a VA doctor that screamed, “Let him commit suicide I do not care” at a suicidal vet seeking emergency, mental healthcare. Two days later that is exactly what happened: the vet killed himself. The corporation gave that doctor a bonus. However, after press releases incited public outcry and bad opinion upon Washington DC lootership, VA discharged the doctor almost a year later for his crime of murder by proxy. **Aforewritten is the reason for ongoing, growing, US veteran suicide epidemic:** that bureau is causing it! They, VSO’s, congress and their journalist toady’s out of willful stupidity to not see the

obvious protests to terrible care from the worst, most corrupt, government run, healthcare system in USA. Or does it? With each suicide, congress throws millions more of taxpayer dollars into the agency's pockets! Va cries alligator tears all the way to the bank profiteering from veteran suffering and suicide. In my case, two primary care PACT nurses baited me about a device VA offered that might help control severe hypertension that is medically untreatable, by VA anyway. I suffer from severe anxiety, depression, and more since in service diagnosis and treatment began in 1975, which VA vehemently denied over 40 years ago after discharge for C&P benefits but insisted upon mistreating in its 'MH-careless' Dallas Regional hospital. **Then sinking to a new low even for VA, an arrogant, misogynist Waco TX adjudication officer blamed my mother for service related problems in a written denial. I still have the rejection letter proving it! I never forgave that corporation for either sin especially about blaming my mother.** Over time, the disease has manifest as hypertension and more health problems. Four decades after military discharge, during Obama's administration, the old, denied messes returned for VA to clean up. According to VA clinic and civilian hospital receiving ER and ICU doctors, I missed dying from them by only a day or two, which would have added me to the more than 300,000 Vets who died while on waiting lists for care. **Medical care rationed because they could not pay with private health insurance, as all those people who could scheduled ahead of them. If taking care of her veterans were truly America's intent, Veterans Affairs would not exist.** Veterans would come under the same benefits the rest of this country enjoys. Anyway, in order to get the thing, I had to go through MHC to do so. Now I have resisted all attempts at going back into that horror-house asylum wasting precious energy telling the same story to different people who cannot handle it then harass me because of their ignorance. Government employees who either do more harm or nothing at best. American mass media highlights these impotent people when bony-fingering Russian or Chinese foibles. Yet, never mention the same and worse among America's Socialist bureaucracies. I wonder why? **Read on for my experience why protesting Vets under VA MHC are literally killing selves on and off VA campuses!** VA's denial to accept and fear of suicide, dying, and death amazes me. Soldiers do not have such airy-fairy luxuries, as do civilians living a Santa Clause syndrome. Moreover, the people working in VA clinics and regional hospitals are horrified at catching something from us dirty old vets. Odd place to work with such fears; for, those toxic hospitals, and clinics are nothing but wounded, disturbed, crippled, sick, dying and death. Nevertheless, the human is an odd creature when it comes to such things. I agreed **only** to interview about a device. However, once there for the appointment everything changed. Where have I seen this before? After signing the bottom line in a military enlistment contract: until I signed no victim, no crime – afterwards, me when everything changed **exclusive to my benefit.** At the appointment, first change was a doctor switch; to an inexperienced, fresh out of school, untrained PhD psychologist very full of herself: psychologists are not real doctors just ask their mothers. Mother's say, 'My daughter the **psychiatrist!** not psychologist.' She was clueless about the device and reason why I was there. 'I came here to discuss the device only,' said I. She got up and left the room – **someone was coaching her from behind the scene**; upon returning unable to do so she asked, 'what should I do now?' [As the doctor, she should know! This is her party. The indecisive woman asked me that more than once. **Ms. Dr. PhD, please return home – your village is missing an idiot.**] 'Send me home,' I replied. Nope, she ignored my philistine suggestion and began asking other questions about my chronic anxiety in a bait and switch deception claiming them necessary to obtain the device. I think this was her feeble stab at **forced** therapy with a hidden agenda! **Forced therapy never works and always causes more harm.** Clearly, this was another instance of VA, cookie cutter one size fits all, of VA giving Vets what **it** thinks they need NOT what we individually need as living human beings. **Immediately, in that hostile, toxic environment I felt provoked, threatened and intimidated.** She had to call someone and ask how to make a referral to the person who actually issues these devices! Then printed off and gave me hard copy of device manufacturer's sales literature. The very expensive appliance is an unproven prototype that VA sent back to manufacturer for more testing and proof that it works. However, I have private health insurance that would reimburse VA all costs...hmmm, this stinks. I felt so alarmed and threatened that every time this loose cannon left the room; automatically, I immediately followed behind her into a hallway in proximity to the main lobby exit door. That is an auto-defense, escape measure for me: always have exits from threatening situations, which engages automatically when under duress. **I was under extreme threat! That response also is symptom of severe anxiety.** I could not breathe in there! It is still unclear why I did not straight away leave that hostile situation. **Up until then, I really wanted to believe VA was there to help me!** Consequently, a revelation that came out at the end of this useless, disastrous 'FORCED therapy' session is that I underwent 'Mental Health 'Care-less'' hell for what the PCP should have done?! Moreover, she said it was only a 30-minute interview but kept adding overtime extensions until meeting her agenda over an hour later. She had something to prove. Essentially Dr PhD. asked the same questions and I gave her the same answers as before to other VA providers in another round of tell me your story, again, in a game of 'how many different ways do you want me to tell you the same story?' **I am neither proud nor ashamed of my military service and do not tell 'War Stories' or wish to remember it; when asked about those years I either change the subject, walk away or simply say I did my time and got out.** What these people do not understand, is each time I retell my story to the same or different person who cannot comprehend, I relive the trauma. Then spend weeks getting over it in a brown airy depression or worse a black one. I am extremely anxious, have an impending sense of doom and pathos, have more night terrors, cannot

sleep, suicidal ideations, and am more susceptible to suicide attempt until this passes! The therapist sleeps fine, but I do not! If any of you fools underwent what military forced we vets to experience, witness, do, know, if you knew what we/I do, none could sleep or want to get out of bed either!! If any of that gets loose, you can kiss everything held near and dear goodbye for the next few million years! That's how long evolution will take to return and catch up to this era. After a very vague disclaimer that *she 'might' be recorded for quality purposes and other CYA verbiage*, I assume was for patient consent to being video or audio recorded without my knowledge, which was not *my* consent, she launched into a verbal questionnaire. I requested a paper copy. She provided only a part of what she claimed was it before verbally resuming her agenda. When I could not or would not answer her questions, she harassed and badgered me for them, – especially to questions, that I did not have a hard copy of – she is hiding something. **I have no idea what Ms. PhD actually fed into the VA system: my answers or her lies?** My fight or flight and danger alert meters were on full defenses and more. Anxiety levels were, too! Blood pressures were off scale and stayed that way for over a week. **I was under attack.** 'You seem tense,' she remarked. 'That is anxiety,' said I, 'and hopelessness is typical to depression.' 'I know that,' she snapped! Sure did not seem to me that she recognized them in real life practical application. She talked so fast I could not track the conversation especially when muffled through a Covid mask. That was irksome alone. I requested she slow down rate of speech at least twice but *instead she sped up rapid-fire questioning, interrogation*. Moreover, the fearful doctor was overly needle-some especially about how I wore my Covid mask. In one instance, I refused to answer a skewed question because half was yes and half was no. 'I cannot answer that,' said I. She then re-framed it many ways and hassled me into finally saying, 'NO!' Meaning I will not answer it. [The information is in VA records and if not then someone is not doing, her job or the 'therapist' was too lazy to look.] She cut to the chase about suicide ideation and attempts. How many attempts? I don't know. [They are not keepsakes like birthdays or anniversaries. Each attempt is an impulsive decision when the thread holding me together snaps! Not a planned event like Bar Mitzvah!] So she asked, 'when was the last attempt?' My reply, 'Last year *around* August...[from suicide in a bottle drugs VA prescribed and insisted that I take even after reporting problems and was the same report previously given along with the VA suicide chat line 'hold please.']] If that person did her job, data is already in their records.] 'Any other attempts?' she queried? 'You tell me,' doctor. Recently during the US race riots, a drive by mugger attempted to rob me while walking alone on a city street. He pulled up and screamed, "give me your money or I will shoot you!" He did this twice because I did not fearfully respond to him as expected. I am fed up with punks and will bite a bullet before taking anymore bullying from anyone. I just stood still looking at this fool on his first try. He pulled up about 25 feet and did it again. On the second attempt I stormed up to the open car window, leaned in, pointed between my eyes, and screamed at him verbatim, "SHOOT ME, ASSHOLE! RIGHT BETWEEN THE EYES, DO NOT MISS, ASSHOLE! WHAT IS THE PROBLEM, ASSHOLE? SHOOT ME! DO IT, ASSHOLE!!" Now I was prepared to self-defend **but gave him a clear and open advantage to take me out first in suicide by mugger.** He was 40 plus years my junior, faster with the first, clear, open shot with his hand on something under a cover over the center console between passenger and driver seats. My weapon buried deeply in a pocket was a long way to go in getting to it. As an old man, I carry a weapon when walking alone in this neighborhood. The druggies like to target vulnerable, old people. I may be crazy but not that crazy and if challenged, intend to take a piece of them with me. Like an old Wild West standoff, with both opponents armed with same intent, but the one who draws first, fires and kills the competitor wins. **I gave him the advantage to kill me first in a death by mugger shooting; like death by cop when one holds an empty gun or toy that looks real while provoking a cop into defensively shooting and killing me first.** Perhaps that is behind the claimed police shootings of 'unarmed' people in 'unprovoked' incidents used to achieve another political agenda while masking it as 'racial, police intolerance?' Anyway, a cop does not deserve the guilt of living with murder but a punk, fool–mugger does!" **Suicide is a death wish. For veterans like me, without the proper care we need suicide is not an if but when one is finally successful. VA knows this and exploits it in murder by proxy of suicidal veterans that it cannot offload elsewhere.** The means justifies the end, *death*. Lady Death again was there at the drive by mugging but refused to take me. **However, the fine PhD doctor's misperception of that second suicide attempt was to reframe it as 'self-defense.'** **A clear case of her headstrong, blind–denial recognizing a suicidal patient!! Another example of what VA does not wish to know - does not exist. That is willful stupidity! I asked her what sane person would provoke and dare a mugger to shoot him as self-defense?! She cluelessly just stared at me like I was growing tulips out of my ears. I have seen that same stupid expression on faces of VA personnel far too many times to mention.** My unexpected response scared and confused the fool-mugger so badly, instead of shooting me; the young man sped off and at street intersection, first he drove straight, then backed up, turned left, then backed up and sped across three lanes of traffic to the right before disappearing. I bet that young cat-head does not pull such a stunt again. **I did not wish to hurt him; but hoped to either teach him a lesson before he becomes another Texas 'prison bitch' for murder or that he would take me out from this hell; a fool–mugger deserves to live with murder.** Now I fully understand why Vets are killing selves while under VA MH - 'HELLCARE.' **VA personnel in psychosomatically, projecting the evil in them onto disturbed vets mentally torture drugged patients into suicide! That is psychological terror and warfare!! A US government agency, VA, is doing that murdering our US Veterans!** I expect the aforementioned men who suicided on VA campus after release from

a VA MHC ward were on psychotic meds, which pushed him into hysteric, high-anxiety desperation to end it all; and, he did so at first opportunity, in a VA parking lot while others did so days later in a VA clinic waiting rooms or campus parking lots! VA is constantly under fire for its haphazard to criminally negligent prescription drug prescribing practices. It is no secret at all, for instance the recent opioid scandal and Clarksburg W. Va., VA hospital murders by a VA nurse from drug overdoses that killed unsuspecting vets. I know of those VA prescribed SSRI and other psychotic meds very well!! **They are high anxiety, creepy experiences like brain worms in the head!** And recently I underwent a crazy making session with someone who in all probability was just like the VA staff that mind-raped those Vets in the MHC ward and clinics that suicided on VA campuses, hospitals and clinics. These fools understand that suicide is an impulsive act and a suicidal person uses what ever tool that is expedient to do so! *The method is moot! One uses whatever tool is handy to end their pain!* **The aforewritten is epitome reason not to contact VA for help! It tortures one for doing so using untrained, incompetent staff that harm vets via crazy-making, mental terrorism and dangerous drugs.** Furthermore, mind-raping someone already troubled, in pain and on psychotic meds drives the person so insane as not to know what s/he is doing or why. The person only wishes to end the hurting! Acts that push a troubled person from ideation into self-destructive attempts that all too often are successful. Moreover, several glaring symptoms of SHELL SHOCK that Dr. PhD did not readily recognize in me:

- Almost 50 years of untreatable Depression; Paranoia, High Anxiety
- Flashback trauma
- Sleeping problems, night-terrors and insomnia*
- Self-destructive behavior; no will to live, suicidal, hopelessness, pathos, death wish.
- Anger, severe irritability, impatience, which are clear symptoms of serious depression.

*I have not had a decent nights sleep in over 45 years, which is the cost to soldiers in keeping Americans safely sleeping cozily in their beds each night.

Consequently is it any surprise why untreated Vets undergoing effects of “SHELL SHOCK!” or the PC soft language of PTSD, resort to suicide ending their insanity. With clueless loose cannons like Ms. PhD. mistreating us, VA is intentionally killing more of Vets with its suicide treatments and preventives than it is helping. For VA, Vet suicide pays the firm very well.

That clinic visit sent me to bed for many weeks in a brown-airy-depression trying to stay out of a black-depression. Those are much different from ‘brown airies.’ In ‘dark-black’ depressions, Hell-hounds come to fetch me into that place. If I had been drugged up with psychotics while being mentally terrorized by that VA PhD my suicide going home would have been mis-documented as another traffic accident. All the way home, I considered speeding my car as fast as it would go and hitting dead-on a solid concrete bridge support without wearing a seat belt. Dead vets cannot talk and a majority of suicides are recorded as ‘other causes’ not self-destruction hiding a national shame. VA juggles its funny numbers - today it is 18, tomorrow 22, yesterday 20, next week whatever lies it schemes up. 100 per day die by suicide: 85 veterans and 15 active duty a day per last figures before censorship silenced the truth. Research reveals that those severely understated numbers hide the fact that VA is very well rewarded for creating this nation’s veteran suicide epidemic! With every new self-destruction, Washington DC throws the company more money as incentive to stop it?! **Essentially, VA lied, betrayed, denied, defrauded, and coerced me into a hostile MHC visit and FORCED therapy attempting to kill me?!** However, I lived to write about it. Their whole MH-careless treatment program is nothing but Quack therapy and snake oil, tent revival, faith healer fraud. In that toxic environment, I was under extreme duress, which was more like a ‘holy inquisition,’ Nazi SS, Communist Chinese or Russian ‘Organ’ gulag interrogation than therapeutic Q&A healing session. **Another, I cannot believe what these people are doing to me!** The same disbelief my Jewish ancestors exclaimed under Dr. Mengele’s human animal experiments on them in NAZI death camps. VA performs those same experiments on Veteran human lab monkeys, pushing them from suicidal ideation over the edge into an impulsive-self-inflicted death. WW2 did not defeat Nazi human animal experiments. They moved to USA and set up shop in corporations like VA to torture and kill veterans. Then it’s awarded more ‘treatment and prevention’ budgets while publicly proclaiming that it cannot figure out why vets kill selves when we help them so much. VA’s new scapegoat, blame game is citing this as an American social and gun problem. Essentially, holding responsible the whole of America for what it created and perpetuates. **Adding insult to injury, VA billed my health insurance \$111.95 for the creative suffering?!** *Benefits maintain that I have no problems at all so it can do that. Withholding service connection for service related treatment allows VA to bill private insurance for them. Years ago, it was called out for breaking the law charging private insurance for service connected issues! So, it made a new plan around the law. VA is a greed and money driven American corporation like all the rest profiting from veteran suffering and suicide.*

Aforewritten recent experience is what happens in VA clinic backroom treatment and MHC wards that nobody but they know about. Dead vets cannot talk. VA employee disrespect of Veterans especially behind closed doors is rampant. **They treat us like dogsh*t under a doormat.** Most of us endure it for a while until the many disrespectful moments add up into an explosive outburst for which VA blames and punishes the Vet. No one looks at what VA staff and bureaucracy purposely does provoking and intimidating a sick, drugged, troubled patient into riot, outrage and suicide. Furthermore, if I TKO and VA faces another media hit or worse, Ms. PhD is their scapegoat out of scandal. After all, dead Vets tell no tales!! VA thinks of everything – almost – except wrongful death lawsuits by families against VA, over 1 billion dollars and growing. The dead vet finally gets justice from the grave against the agency's injustice.

Moreover, as passive aggressive protests against the lousy treatment we receive from the institution, VA has a very large problem with Vet appointment ***no shows***. On the surface, it appears Vets are at fault, blamed and punished for this behavior; however, no one asks what VA staff is doing to cause and encourage our conduct. ***An ongoing practice is when VA schedulers purposely schedule appointments unknown to the vet creating 'no shows' to CYA 'cover their assets' making the patient appear at fault, which is variant to scheduling fraud underlying those of Obama's Phoenix Az scandal.*** I asked a nurse why so many no shows and she said, 'they [vets] get meds refilled then do not show up [wasting their time] for follow up appointments' then left it at that. Now I recognize why after undergoing the passive to outright direct hostile attack and intolerance by some clinic staff employees, above-mentioned doctor, and those like her. My pleas for help with suicidal ideation, attempts were unheard, met with hostile intimidation, indifference "I am sorry to hear about that...[suicidal ideation]," said a nurse during interview as she continued her questions. There is VA's suicide vet epidemic that it owns in toto. VA, same as all HMO systems, receives 'Capitation payments' from GAO for each active Vet on their rolls. More numbers is more money. Money for nothing when we are not in the clinic; losses when we are in it or not active in the system, with exception for people paying with private insurance; those patients are lured in for billing purposes adding more profit to capitation payments. Another point is to drive away high liability, hard to treat or 'IP,' 'identified problem,' patients. In other words, institution staff offloads, 'cherry picks and lemon drops' and 'patient dumps' high responsibility or troublesome Vets to escape liability and onus same as private sector medical industry. Especially high-risk and/or suicidal mental health cases: it dumps the patient while keeping budgets. I have faced more stigmas out of US and VA healthcare industry for MH issues, institutions that claim to help us, than anywhere else. On my first visit, that was the first thing the VA MHC Dr. did. She prescribed meds, that only made me sicker, and brochures to civilian 'free' MHC clinics saying 'go there,' then sent me home. In other words 'PATIENT DUMPING' liability while keeping MHC budget in house that remained unspent and was misappropriated to other non-Veteran expenses feeding agency bureaucracy – VA bonuses, raises, perks and other employee benefits. See GAO, OIG and media scandals about those issues. However, being a taxpayer-supported institution, culling patients does not yet carry fiscal and legal consequences that private sector medicine faces when judiciously employing 'cherry picking, lemon dropping' patient dumping practices. I have undergone this experience at VA three times, so far. A medical staffer, usually a nurse, nurses run the place BTW, in private office setting provokes, needles and acts hostile toward a patient trying to force a knee-jerk reaction out of him or her. When it happens, s/he then calls for backup security to remove the person, blames and flags the Vet as a 'problem patient.' In many cases, it angers a patient into not returning to the clinic while s/he also passively protests by not showing up for appointments. ***In the worst of cases, a Veteran kills self on VA campus or somewhere immediately off reservation as protest when overwhelmed and snaps into impulsive self-destruction while VA publicly sheds alligator- \$\$\$\$ - tears that it cannot understand why....*** When I recognize this **hostile, projective identification** by a staff member, consciously, I control from reacting in kind to an attack, disarming the situation. Then report s/he to executive offices and clinic director. Patient Advocate is pointless; it sweeps these matters under the carpet and those at the top never know about problems at the lower levels allowing it to hide behind plausible, willful, deniability when scandal erupts. In one case, an inexperienced NP still hit the eject button without probable cause, dumping me elsewhere, ***hiding her incompetence and neglect.*** Escaping liability for a high-risk patient, she sought to do that from the very first visit while under '***do not treat***' orders from secret lists because I refused to take ***suicide in a bottle*** drugs. Ms. NP was leaving the clinic anyway so did not face follow-up complaint consequences for her actions. Someone from behind the scenes in Dallas was coaching her. ***When a patient refuses to take medicines, even when they cause reported suicide attempts or other serious side effects, VA punishes s/he by placing individuals on a secret 'Do Not Treat' list. What good is a timely appointment when the care is non-existent, crippling or deadly? Is this the next scandal sequel to the secret waiting list outrage of Obama's era? Ms. NP refused to treat my chronic hypertension problem over 7 months because I was on a secret "do not treat list" as an IP.*** Her Rx: call 911 in case of stroke or heart attack; VA charged my medical insurance nearly 200.00 dollars per visit. It required complaining to Ft. Worth, TX clinic director's office in writing before a real doctor got involved at all. I have seen this done to other Vet patients and have undergone it as well before understanding some of the agencies methods behind its madness. That is VA's claim of avant-garde medical care on par or better to private healthcare? On the surface it appears we Veteran's are at fault for why VA is losing Vet numbers; not what VA employees are doing to cause and encourage

those losses! Same for Vet suicides on and off VA campuses! No one asks or even looks at what institution staff is doing, openly and behind closed doors, causing and exacerbating those deaths! That was my reason for walking away over 40 years ago after discharge and swearing I would die before ever setting foot in that shit hole again after my tolerance for maltreatment and racial bias by those bureaucrats reached maximum limits. Not much about VA has changed since, just different facilities, faces, and politicians: SOS in a different paper cup. *No shows and suicides are Veteran passive-aggressive and final protests against the lousy mistreatment we receive.*

Opponents of VA privatization claim that the plan will never work citing end of the earth dire consequences at mere mention of such blasphemy. How can they know that? It has never been globally attempted. However, privatization is very successful according to each Veteran that never sets foot in a VA facility and per all of us who self-privatize each day either partly or in toto out of that hell-care corporation. Every Veteran I personally know, only goes in to VA clinics for service connected circumstances to maintain his or her disability status from another denial. The rest of their medical care, including medicines, come from private sector healthcare, oft times including service connected conditions because they mistrust VA incompetence to not cripple them more!!

The most damning testament that privatized Veteran healthcare works is over 90% of all US Veterans do not use VA at all, per a Rand Report. VA 'cooked' numbers are that almost 87% do not use the agency at all. Independent polls, unskewed by special interest and VA bias, from a cross section of all US Veterans who responded conclusively returned that over 88% of them want private healthcare and true choice outside of VA, GOVERNMENT OVERSIGHT. In other words, an overwhelming majority of military veterans want private care, do not use VA at all; and those who do only use a small part of it notwithstanding the captive 'prison inmates' who cannot get healthcare anywhere else. Almost 100 of these captives commit suicide every day ending their pain protesting against injustice of a national shame. Only the deaf, dumb, blind, and willfully stupid refuse to see this at least vaguely.

Nothing has changed in over 40 years since first contact with VA after discharge. VA and transition benefits were and remain a complete fraud. I was salvageable then. When applying for C&P and service related help, VA betrayed me, lied and denied them in Toto, and then misogynistically blamed my mother for service related problems! Moreover, the arrogant adjudication officer was bold enough to put that in writing, and I still have the rejection letter proving it. I never forgave the company for either sin especially about blaming my mother or for murdering my dad.

I never understood what people are thinking when screwing over everyone else for percentages of the take, action, or loot. Surely, you realize – it is never enough! One forfeits everything making the final trip out of here in a decorated box, covered with flowers, riding in the back of a black limousine, to spend eternity ENCHAINED to all that baggage in a graveyard. So one must ask the question: If that is what life's about, what is the point of living! What matters? What matters?

In closing, I did not use specific dates or names of VA employees; this is not personal or a witch hunt; the cancer is epidemic across the whole VA corporation. I pose a rhetorical question: what if a population were purposely fed mind altering, crazy-making substances via daily mass consumed items such as processed food, drinks, medicines, bottled water, vitamins, etc. that build up in a body over time to toxic levels. While constantly mentally terrorizing those consumers via mass media consumption creating hysteric, high-anxiety that generates an en masse mental health and suicide epidemic and more: global warming and Covid hoaxes for instance. Psy-warfare weapon research for use in defeating enemy nations over time from within. *VA does more 'research' using Veteran lab monkey's than it does anything else – except on dogs and cats, feeding their friends at the pork trough.* Much like the undetectable HCV bio-warfare virus experiment used on US generations born between 1945–1965 to observe how it moved through society due to medical ignorance. Just a simple thought to ponder...the lootership would not do that to us, would they?

DENIAL IS NOT ALLOWED

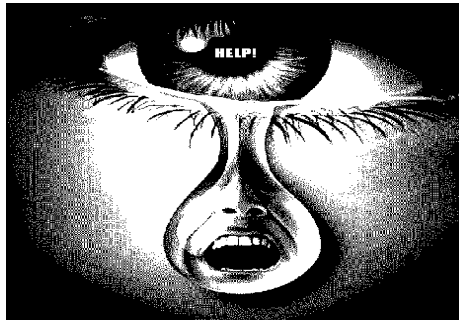

100 Active Duty military and ex-military Veterans SUICIDE every day in not getting the needed care from America or Veterans Affairs. How can 'We Sheeple' hide from such atrocities? Americans never have been concerned when their personal choices infringe upon or even harm the well-being of their fellow citizens – *until consequences boomerang back on them.*

VA SUICIDE PREVENTION AND TREATMENT PROGRAMS.

WHEN REQUESTING

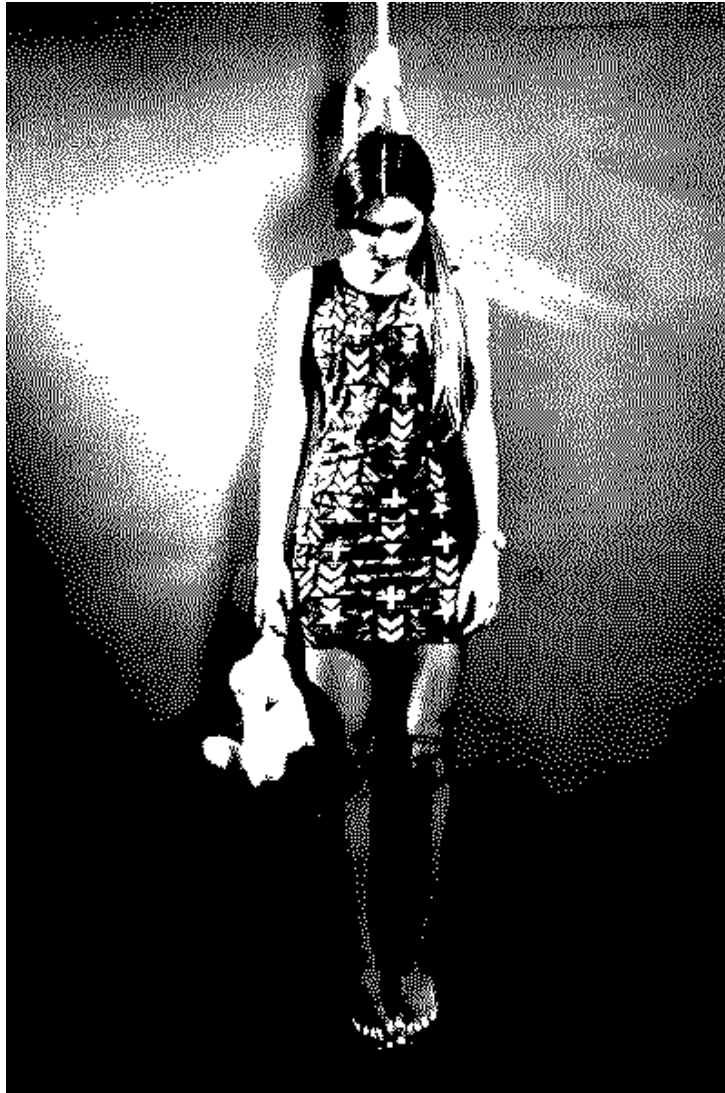

VA PRESCRIBED HER A ROPE.

VA's SUICIDE PROBLEM MAY BE RESOLVED

BUT NOT For HER

VA and America refused her help.

So, this Veteran died alone with only a teddy bear as comfort.

Only America and VA can stoop this low profiteering from veteran suffering and suicides.

100 PER DAY Military and Veteran SUICIDE is no joke.

VA Making Amerika great again. Do we kill 'em and how!

Make Amerika great again.
